

# **Basic Web App Development**

---

Event Time: **24th September 2025, 3:00 PM – 4:00 PM** (1 Hour)

Mode: On Lab PC (scenario + task file will be provided at event start)

---

➤ **Event Flow**

1. **At 3:00 PM**, you'll receive a task file on your PC.
  2. The file will contain instructions + marks for each task.
  3. You must build a working single-page web app based on those tasks.
  4. Each feature you add correctly will give you the marks mentioned beside it.
- 

➤ **Evaluation Criteria**

- Marks – Based on tasks completed (as written in the file).
  - Neatness – Code readability + clean UI design.
  - Time – If marks are tied, submission time decides.
  - Attractiveness – In case of same marks & time, the cleaner and more appealing design wins.
  - Winners – Top 3 participants will be selected.
- 

➤ **Rules & Regulations**

- Complete work within 1 hour.
  - Maintain originality – only copy-paste projects are disqualified.
  - ChatGPT / online resources are allowed, but final work must reflect your own understanding.
  - **Respectful behaviour is mandatory – misusing devices, disturbing others, or offensive language leads to immediate disqualification.**
-

➤ **Basic Web App Development Guidelines**

- You may use Node.js (Express) or Python (Flask) – whichever you are comfortable with.
- Keep your project simple but functional (don't overcomplicate).
- Add basic routes/pages (home, about, contact, or as per task).
- Use HTML + CSS + JavaScript for the frontend.
- Keep your UI clean and user-friendly (no need for fancy designs unless you have time).
- Make sure everything runs locally without errors before submission.

---

**# Tip: Focus first on completing the core tasks given (so you secure marks), then use extra time for neatness and design polish.**

---
